

Prompt:

Write a Python program to check whether a number entered by the user is even or odd. Use the modulus (%) operator to determine whether the number is divisible by 2. If the remainder is 0, display that the number is an Even number; otherwise, display that it is an Odd number.

Program:

```
num=int(input("Enter a number:"))  
if num%2==0:  
    print("{0}is Even number".format(num))  
else:  
    print("{0}is Odd number".format(num))
```

Sample Outputs:

Enter a number:7

7is Odd number

Enter a number:8

8is Even number
